

# AFSUMB 2024

The 16th Congress of the Asian Federation of  
Societies for Ultrasound in Medicine and Biology  
*in conjunction with KSUM 2024*

*Shaping the Future with Ultrasound*

May 9 (Thu) – 11 (Sat), 2024 | Coex, Seoul, Korea

**Speaker:** Sae Rom Chung, Korea, Republic of

**Affiliation:** Asan Medical Center, Department of Radiology

**Lecture Title:** US Anatomy of Nervous Structures in the Neck (Lecture)

The neck contains numerous nerves and an understanding of neck nerve anatomy through ultrasound imaging is important in the diagnosis and treatment of masses occurring in the neck. In this lecture, we'll explore the anatomy of nerves in the neck based on ultrasound imaging, including the vagus nerve, superior laryngeal nerve, recurrent laryngeal nerve, cervical sympathetic ganglion, brachial plexus, cervical plexus, phrenic nerve, and spinal accessory nerve.
